STAR MAPS AND STAR APPS WORKSHOP

Saturday, June 6, 2026
from 1 to 3 pm
at the Eureka Main Library
1313 3rd St.

The Astronomers of Humboldt and the Humboldt County Library are holding a workshop for anyone interested in finding their way around the heavens at night.

We will discuss observing aids, from astrolabes (2nd century) and planispheres (17th century), to the latest online star charts and phone apps. We'll show you how to get them and use them. Members of AOH will be on hand to give hands-on instructions and advice.

Children should be accompanied by an adult.
